

TVÍÞÁTTA AUÐKENNING (MULTI FACTOR AUTHENTICATION) Uppsetning í síma – SMS eða App

Tvíþátta-auðkenning (MFA), stundum köllum fjölþáttaauðkenning er notuð til þess að herða öryggi í Office 365. Auðkenningin hjálpar til dæmis ef að óprúttinn aðili kemst yfir lykilorðið þitt, kemst hann ekki inn á notandann þinn nema vera með hina auðkenninguna líka, þ.e.a.s. SMS-ið sem þú færð eða tilkynninguna í Appið (eftir því hvað þú ert með uppsett). Hér eru nokkrir kaflar sem fara í gegnum uppsetningu í fyrsta sinn, bæta við sig auðkenningu og einnig ef þú færð nýjan síma.

Leiðbeiningarnar í köflunum <u>Aðferð 1 - SMS</u> og <u>Aðferð 2 - App</u> gera ráð fyrir því að þú sért að setja upp tvíþáttaauðkenninguna í fyrsta skiptið. Ef þú vilt bæta við aðferð og vilt hafa bæði SMS og appið (aðra sem varaleið) þá er sýnt hvernig bætt er við aukaleið í kaflanum <u>Bæta við aukaleið</u> hér að neðan. Síðasti kaflinn, <u>Nýr sími – app leið</u> fjallar svo um ef þið skiptið um síma og þurfið að setja upp auðkenninguna aftur (á aðeins við um ef þið veljið að vera bara með Appið þar sem símanúmerið flyst eðlilega með í nýja símann).

Aðferð 1 – SMS

- 1. Fara inn á <u>aka.ms/mfasetup</u> í tölvunni ykkar.
- 2. Skrá ykkur inn með skólanetfanginu ykkar.
- Þá ætti að koma upp að þið þurfið að veita meiri upplýsingar, veljið Next.

8. Nú færð þú prufu tilkynningu í símann sem þarf að samþykkja með því að smella á **Approve** á tilkynningu í símanum.

9. Að lokum gæti verið að þú sért spurður um símanúmer, það er skráð sem varaleið og mikilvægt að fylla það út.

Bæta við aukaleið

Ef þú ert með SMS leiðina uppsetta en vilt setja upp appið eða öfugt þá er ekkert mál að bæta við fleiri auðkenningarleiðum og velja svo þá sem er aðal og þá eru hinar leiðirnar vara ef þessi aðal klikkar einhverra hluta vegna.

 Fara inn á <u>aka.ms/mfasetup</u> í tölvunni ykkar og skráið ykkur inn með skólanetfanginu ykkar. Núna, af því þið eruð með tvíþáttaauðkenningu uppsetta þá leiðir hann ykkur

| 2. | inn á ykkar öryggissíðu. Þar undir Security info flipanum geti þið bætt við auðkenningar aðferð með Add method takkanum | Q Overview Security info Organizations Devices Privacy | Security info These are the methods you use to sign into your account or reset your password. 3. Þið veljið þá úr flettilistanum hvaða auðkenningu þið viljið setja upp, fylgið skrefunum og bætið henni við.

4. Þegar það er klárt þá sjái þið á aðalsíðunni hver aðal auðkenningar leiðin ykkar er og getið breytt því ef þið viljið. Þarna á myndinni er Appið aðal leiðin.

Nýr sími – app leið

Ef þú ert aðeins með SMS leiðina uppsetta þá þarftu ekki að hafa áhyggjur, þú færð bara SMS í nýja símann þinn.

Til að þetta virki sem best þurfi þið að vera í skólanum á skólanetinu.

- 1. Fara inn á <u>aka.ms/mfasetup</u> í tölvunni ykkar og skráið ykkur inn með skólanetfanginu ykkar.
- 2. Undir Security info sjái þig Microsoft Authenticator sem aðferð sem er uppsett. Smellið þar á **Delete**
